CONTRACTOR SPOTLIGHT

HARRIS

REMARKABLE PEOPLE. REMARKABLE RESULTS.

Harris is a leading national mechanical contractor specializing in in-house design and engineering, construction, building automation, service, manufacturing, conveyors and end-to-end building systems. Since opening our doors in 1948, we have grown to 15 regional offices and more than 2,000 employees. Harris works on projects of all sizes, scope and complexity across the U.S. in a wide range of markets including amusement and recreation (stadiums/casinos), commercial, data centers, education (K12/universities), federal government, healthcare, industrial, lodging, manufacturing, places of worship, power delivery, telecom and water supply.

Harris has been a fixture in the Salt Lake area since 2006 and many of our team members have been working in the region for over 25 years. Locally, the team has greater than 90% repeat business and more than 70% of our work is design-build or design-assist. Customers benefit from our national reach, regional offices, local and national expertise and more than 70 years of experience. Our combined resources allow us to support any project and provide the care and dedication necessary to deliver quality and success. Owners, general contractors and other project stakeholders can depend on Harris to meet design, pricing, delivery and performance goals on every job.

Crews also know our jobsites are second to none on safety, quality and scheduling. With nine strategically located prefab fab shops across the country – including Salt Lake City and Las Vegas – we provide the fastest and safest delivery of mechanical systems and components to our jobsites, reducing waste, mitigating schedule conflicts, decreasing installation time and optimizing safety protocols. You've likely seen our trucks in the area, including at the Utah Transit Authority where we're working on Harris' \$6.5M portion of the new maintenance, operations and administration facility.
